# 1 Use Case List

This section will contain a list of all the use cases identified using the user stories defined earlier in the sprint. The list of use cases below will be divided into three categories, namely:

- **Vital:** use cases that are vital to the system to function.
- **Complementary:** use cases that support and enhance the system but are not very vital to the system's operation.
- **Fluff:** use cases that enhance the system and improving the user experience.

## 1.1 Customer

The following is a list of all use cases that are related to the customer. That is, the use cases that the customer will interact with.

### 1.1.1 Vital

#### i Customer Account
